COURSE OBJECTIVES

This course provides an introduction to the key concepts and practical applications of international trade theory and policy. It explores the fundamental principles underlying global economic interactions, trade theories that explain patterns of international exchange, the role of firms in the global economy, international trade policy considerations, and the political economy surrounding trade policies. The course is designed to make complex trade models accessible through clear language and illustrative examples.

Upon completion of this course, students will be able to:

1. Develop a comprehensive understanding of key concepts and theories related to international trade.
2. Utilize international economic concepts, principles, and models to analyze worldwide phenomena and the relevant policy discussions.
3. Critically analyze the process of formulating and implementing international trade policies.
4. Examine the interaction between political and economic factors in shaping trade policies.
5. Perform economic analysis of the global economy and society, and independently conduct applied research on international economic problems.
